Freefoam's unique Roofline Colour collection with Colormax™ technology

Freefoam's innovative Colormax™ technology provides ground-breaking colour variety, colour matching and colourfastness. As a result specifiers, architects, contractors and homeowners are now empowered to put their individual mark on their house or project.

Full Colour Range

Products available from stock in the above colour range.

FMS:
175, 200, 225, 410

GPB:
150, 200, 300, 405, 605

TRIMS:
F106 & F107, FWX, FWJ, FWXX, FWXI, FWJ

FIXINGS:
P40, N65

All products in the above colour range are subject to lead time.

Notes:

1. Colours shown are for availability identification only. Please see colour swatch or product samples for exact colour representations.
2. Please note that the nearest Ral numbers above are provided for reference purposes only and do not guarantee a precise match. It is recommended that actual Freefoam product samples be used for comparison purposes.
3. Please contact Freefoam or see our Technical & Specification Manual for nearest Pantone and NCS reference numbers.
4. A wider colour range is available for special projects and a colour matching service is available subject to lead-time and minimum order quantities.

Please note that a lead time may apply to some products listed in this catalogue

Wood Grain Mahogany (WGM)

Wood Grain Oak (WGO)

RAINWATER SYSTEMS

Freeflow is a range of innovative, high quality PVC-U rainwater systems available in Square, Half Round, Ogee and Deep.

CO-EXTRUDED GUTTERS

Each rainwater system is co-extruded with a white interior and a range of exterior colours - Freeflow's innovative solution to the problems associated with rapid heat absorption and expansion of gutters.

INTERIOR DECORATIVE PANELLING

Geo-panel®

Geo-panel® interior decorative panelling offers home owners, house builders, local authorities, developers and installers a stylish, modern and convenient interior decorative panelling system. Geo-panel® is a cost-effective and practical alternative to tiling and other conventional materials. It provides a smooth, decorative, waterproof wall covering for new and existing interior walls and ceilings in homes, offices and in industrial applications where hygiene is key.

Geo-panel® is available in a large range of stylish designs and colours. It is waterproof, hygienic, durable, virtually maintenance free and does not discolour. In addition, the panels fit together with a waterproof tongue-and-groove joint to ensure quick and easy installation without the need for grouting.

Features and Benefits

Geo-panel® has a substantial range of impressive features and benefits including:

- Available in a large range of stylish designs & colours.
- Waterproof.
- Hygienic.
- Virtually maintenance free.
- Does not discolour.
- Tongue & groove design for quick & easy installation.
- Durable.
- Suitable for walls & ceilings.
- Lead-free.
- Versatile - suitable for home, office and industrial applications.
- Complete range of trims available to ensure a neat and professional installation

Features and Benefits

Due to the innovative nature of the product, Edenex® decking has a range of truly unique features and benefits including:

- Low maintenance (treating not required)
- Maximum durability
- High strength
- Slip resistant surface
- Natural, warm feel
- Water resistant
- Splinter-free
- Will not warp
- Will not split
- Resistant to insects
- Available in a range of colours
- Easy to install with hidden, snap-together system

Colours

Edenex® decking is available in a range of three beautiful colours including Chocolate Brown, Pebble Black and Slate Grey

Chocolate Brown

Pebble Black

Slate Grey

Edenex System Part Quantity Requirements

Part	Deck area (Square metres)			
	6m ²	12m ²	18m ²	24m ²
Planks (ETD4)	11	21	32	42
Beams (ETB4)	5	9	13	16
Clips (ETCP)	99	189	288	378
End Clips (ETECp)	10	18	26	32

Note:

Please note that the part quantity requirements outlined above are a general guideline only and actual requirements for specific installations may vary.

Dimensions
Plank (ETD4): Length = 4m; Width = 140mm; Thickness = 28mm.
Support Beam (ETB4): Length = 4m; Rectangular: 60mm x 50mm.

The Freefoam Guarantee is backed by leading-edge Technology

Due to its leading-edge technology, Freefoam can offer a ground breaking 30 year extended transferable guarantee on all white* products, and a 10 year transferable guarantee on all coloured* and foiled woodgrain* products. The 30 year extended guarantee is backed by Freefoam's environmentally friendly, lead free formulation and subject to the terms and conditions outlined below.

The 10 year colour guarantee is backed by Freefoam's innovative Colormax® technology which provides ground-breaking colourfastness, colour variety and colour matching. By using a proprietary formulation that contains a unique selection of stabilisers and pigments specially chosen for their high colourfastness properties, Freefoam can confidently offer a wide range of colours.

The 10 year foiled woodgrain guarantee is backed by market leading Renolit EXOFOL MX foil incorporating its Solar Shield Technology (SST). SST offers built-in sun reflection which reduces heat absorption, thus minimising profile temperature and expansion. Guarantee certificates are now available on all of the above products through Freefoam's online guarantee registration system.

Customers not availing of the online registration system to obtain a certificate will still qualify for the standard 20 year guarantee on all white products. All guarantees are subject to terms and conditions as outlined on our website (www.freefoam.com/guarantee)

COLORMAX[®]
technology

STOCKISTS

Stockists, who promote the Freefoam guarantees to customers, offer a superior package.

"The Freefoam guarantee adds credibility to our roofline range and our installers have found it to be an excellent sales tool"
Mark Warren, Lister Trade Frames.

INSTALLERS

Installers, who offer the Freefoam Guarantees, win more business by offering a stronger sales proposal.

"The main benefit for us was the Freefoam Guarantee on all parts of the roofline"
Leigh Stevenson, Kirk Hallam Homes.

For more information or to register, log on to www.freefoam.com

* Please see www.freefoam.com/guarantee for guarantee terms & conditions.

Become a Freefoam Registered Installer TODAY!

There's never been a better time to get your business aligned to one of the major roofline brands. By becoming a Freefoam Registered Installer you will benefit from our excellent marketing and sales support package and also be able to offer our industry leading 30 Year Extended Guarantee.

REASONS TO BECOME A FREEFOAM REGISTERED INSTALLER

- Offer your customers total peace of mind with a 30 Year Extended Guarantee on white roofline and rainwater products*
- Stand out from the crowd. Only Freefoam Registered Installers can offer the Extended Guarantee.
- Receive a FREE marketing and support package to help you close the deal.
- Dedicated website: www.myfreefoam.com
- Receive more leads from our website: www.myrooflinematters.co.uk

Your Local Freefoam Stockist

Freefoam is committed to the prevention of pollution and to continual improvement in environmental management and performance. To reinforce our commitment we have achieved ISO 14001:2004 Environmental Management System certification in Group and implement this on an ongoing basis.

Freefoam and Recycling

- Freefoam produce products with up to 85% recycled content, such as our coextruded rainwater system.
- Freefoam currently recycles 85% of post production waste and are targeted to increase this to 98%.
- Freefoam keep scrap rates below 10% with highly efficient production processes.
- Freefoam products are 100% lead free; we mean complete product, not just the skin.

Note: All specifications, dimensions, descriptions and illustrations contained in any Freefoam sales literature, quotation, or pricelist or other advertisement matter are intended merely to present a general idea of the goods that we sell. We reserve the right from time to time to make changes which are required to comply with any applicable safety or statutory requirements or which do not materially affect the quality or fitness for purpose of the goods you purchase from us.

Flammability of Extruded Freefoam PVC Product

Test Method:

BS 476: Part 7: 1997, Method for Classification of the Surface Spread of Flame of Products.

Tested by:

Warrington Fire Research Centre Ltd, Holmesfield Road, Warrington, UK WA1 2DS

Freefoam products have been awarded the following classifications

Warres No.	Freefoam Material	Classification
0459	Hollow Soffit	2Y
0458	Magnum Fascia (18mm)	1
0457	Cladding (10mm)	1Y

Classification of spread of flame

Class	Spread of flame at 1.5 min.		Final spread of flame	
	Limit	Limit for one specimen in sample	Limit	Limit for one specimen in sample
Class 1	165 mm	165 + 25 mm	165 mm	165 + 25 mm
Class 2	215 mm	215 + 25 mm	455 mm	455 + 25 mm
Class 3	265 mm	265 + 25 mm	710 mm	710 + 25 mm
Class 4	Exceeding the limits for Class 3			

Explanation of prefix and suffixes which may be added to the classification

Suffix R	Added if more than six specimens are required in order to obtain six valid test results.
Prefix D	Used if product does not comply with surface characteristics specified in Standard.
Suffix Y	Used if any softening and or other behavior that may affect the flame spread occurs

Properties which make PVC inherently Flame-retardant.

The fire hazard of a product is determined by ignitability, flammability, the amount of heat released when it burns, the rate at which this heat is released, the flame spread, the smoke production and the toxicity of the smoke.

The properties outlined below show why the fire hazard associated with PVC is low.

Ignitability: ASTM D1929: With Flash ignition temperature 391°C and Self ignition temperature of 454°C, PVC is amongst the least easily ignited polymers.

Flammability: ASTM D2863: PVC has a Limiting Oxygen Index (LOI) of 34. In general a material with an LOI greater than 21 (the oxygen content of air) should not burn at room temperature and an LOI greater than 27 should only burn under extreme conditions.

Heat Release: ASTM, E906, The maximum rate heat release from PVC is less than 120 kW/m², this is quite low in comparison to most polymers.
