

...the window system with softer lines

## Style needn't mean compromise

Take a look at the stylish lines of the **VEKA Fully Sculptured Window System** and you will see PVC-U in a new light.

As technically advanced as it is beautiful, **Matrix FS** rewrites the rules, adding a softer, more rounded look to suit any home, whatever its size or vintage.

Its perfectly balanced curves and slender sightlines create a unique appearance that blends with the character of classical architecture but is equally at ease in the most contemporary of homes.

**Matrix FS** is the latest in a long heritage of **VEKA** PVC-U frame technology that has stood the test of time in some of the world's largest and most prestigious building projects as well as literally millions of private homes.

## The choice of specifiers

## The choice of fabricators

## The choice of homeowners

## Style and functionality

A white-framed window is shown against a blue background. The window consists of two panes. The upper pane is tilted upwards at an angle, revealing its internal frame and support structure. The lower pane is fixed in place. The frame is white and appears to be made of plastic or metal. The background is a solid blue color.

## Open new doors

## Versatility

The VEKA Fully Sculptured system can be used to create traditional casements, tilt & turn or french windows which are a popular option for a secure method of ventilation coupled with easy cleaning from the inside.

...the window system with **softer** lines
